

The new reality under the new world order

KURODA International

Takeshi Kuroda

The invasion of Taiwan killed all their LCI industry, and New CPU from China was rejected. Under Free trade rules, the Western camp must take all.

In all these circumstances, we make our decision. We are trying to close its market and make our trade alliance. With the purchase of all foreign capital in politics, the domestic industry is completely transferred to domestic capital.

The exploitation of capital and the renunciation of debts will be denied entirely, and the capital purchase will be converted into domestic capital.

On the other hand, we expand our vision of the world to ask for a new relationship with the world. These are under equal presence. We may ask for its steps ours.

Bases of foreign affairs go with AIIB. This means that development and cooperation under Eurasia are all based on regions.

Japan is perfectly ignored as the enemy.

Under all these realities, we must take different political stances and actions.
