

The world and reality of Ukraine

KURODA International

Takeshi Kuroda

All these tragedies are ignored by menacing forces in the nucleus of Russia. The USA was, as they insisted, the police of the world, but we have all differences as a change of the world reality.

United nations may not ask for solutions for all these war crimes. The insistence of Russia is their national security. Affiliation of NATO harms them under power politics, but a new reality, under massive national power, is that Russia may not stand against Western Camp.

All these power games ask for the end of history. Massive power by technology and capital ask for an end of all games.

These are the new presence of the world, and the world has its justice today.

Any history and World war 1st and 2nd were power games. The winner takes all, and they have made a world.

What do we see today? Progressed technology and academic progress, massive capital under capitalism, space technology, and their new reality that what is.

In truth, we may not cause all massive presence, and it could seek eternal existence.

All these are tails of the new world order. These are the reality and truth. Only permission we may stand equal to the world is we prepare for the same reality in our tails.

In any history, we have victory and defeats. And that was a decision of the future. We may not follow any idea from the CIA but reality and truth.
