

The world decision

KURODA International

Takeshi Kuroda

The new world order is only a reality we have in the world. Then what remains, after all? It comes with a decision.

That comes as a world decision we have only permitted in reality.

We are missing everything but coming reality only we have as reality. That means we have to know all plans. And we must understand that is the only reality we spend and come.

The world decision is a coming reality we have to see as an eternal future.

On the other hand, we have John's apocalypse. I do not know if it comes with truth. But to be compared with both what we can see.

We need all information under it that we are only permitted anything but nothing.

If Mr. Rockefeller sent a New World Order schedule to the United Nations proper, it would require self-selection. And honestly, the UN is his castle.

There must be a meltdown in the future, and the Davos conference speaks as a great reset comes with their world.

It comes as the last answer we aim against their world government.

We move all our army forces against and build our world government.
