Takeshi Kuroda

The world gains new changes, which shift to the future under any creation of it. We need to know why all these changes are given to the world. A way to do this must be found when a new world is born.

If all these are the reality and the truth, we need our actions to occur in our future with the world.

Change is a new creation of a new world itself. So, those who fail may not reach the future.

And we may ask who should have gained it. That is who is chosen by the world. And wiseness is the right action for us to take with the world.

We find all reality to be like any conflict in the Middle East and Ukraine. How should the new world be born? Is there someone willing to cause it, or must we all follow all realities?

But for any truth, we have a choice of self, which is any direction to any future.

We had a challenge which is called the past of any history. And we need to know who may reach the future.

We are experiencing the growth of new realities today, which has caused changes in society and livelihood. These are the latest steps we can take in the new future.

But the future exists, and we can't be away from it. Then what do we do?

We need the right decision against it, which may only be permitted in the future. Above all, we finally have to face the reality of the world.

Then we have a choice to cause a future itself. We have tried to propose new ideas and visions of the new world from our office to the world. These are any honor of all ours.
