

Through with all dialogue with new world

Kuroda International Foundation

Takeshi Kuroda

Any difference we could see with a world as USA is back to unilateralism from world responsibility. That cause growth of own identity.

These are bases with different root and identity we could know with history. That with a new idea not govern from justice but all dialogue.

Dialogue should reach agreement as construction of new world. Permission of autonomy gives new reality and cooperation with a world.

As bases of unification of whole Asia with this consensus. Even expand to whole world as such.

This new free world could dream new futures. As we consider 20 Century that is covered under Western justice. With new technological civilization is all reality of 21 Century.

There is all variety that we share the history and cultures. All these different if bases of futures.

Unification and creation are with idea and philosophy. That for all result of history we may dream the futures.
