To consider world economic crisis and waiting new world

KURODA International Foundation

Takeshi Kuroda

With all debt occurred with COVID-19 that we could reconsider coming future. All technological progress bases to see reconstruction of new world. Top presence is with all Western camps and asking to pay for all services. That means all presence of technology gathers all wealth and all its hieraruki may not be failed.

These are totally different from now but futures. They have all justice that may not be caused. As we may consider that 2 divine of the world to be waited from WW3. But to be wise that this is only a trap.

All financial collapse of nation surely gives economic crisis. These are only a beginning of all confusions.

As we could find all coup of the world that we see to disclose all information. Those are not restricted but as revolutions.

Any progress of western camp may not be ignored even step of theirs. That we must follow to build self but they have their tails of their reality.
