

To humanitarian self-transformation in the People's Republic of China

KURODA International Foundation  
Takeshi Kuroda

Persecution in Uighur and Tibet is against global trend in humanitarian nation-building, and it is the world's public opinion to seek improvement. These require a shift in national self-standards in that the world has a shift from the inhumane reality of the past to a new future.

These new societies and lives in humanity are new trends in the world, which give them participation in philosophical and ethical inventive step.

From a personal point of view, all people, regardless of race or religion, have participation in the world with the same rights and human rights. The right to freedom, which is not compulsory subordination, must always allow one's choice. Freedom of speech are a testament to that freedom, and these are signs that politics has its own righteousness.

These realities are scattered all over the world, and the world has the same reality as the Western parables of the north wind and the sun.

The birth of America in the 20th century is accepted by the world, and the trend creates today. These revolutionary changes, along with the current life and social transformation of the IOT, are a clear reality.

Advances in sociology in the West give central leadership in the world. The existence that confronts these on an equal footing has not yet emerged from outside the West.

These are the inventive step of reality and the world, and the world follows this. Because there is no other choice, these trends are nothing more than people's admiration.

Office to access the world.
