

To see the world and make the last decision for the future.

Office  
of  
Kuroda International Consulting  
Takeshi Kuroda

We may have no way to escape. We need our decision.

Any realities govern the world, forcing us to face the future. Spend ourselves under military force to stand against the world. That only permits us to step into the world and hereafter.

As we need our economic group to face the future. We are giving our vision to the future.

We can find three groups. Liberal camp and Russia and China group, us.

This comes to seek to build our reality within all truth we have in reality called new world order. We must seek two divines of self.

Equal reality as economy and technology, military, space, capitals that gives us equal position to any reality coming its future.

We have to know that Russia and China belong to the liberal camp. Coming world war 3<sup>rd</sup> is only a party of the military-industrial complex.

Great reset is the last opportunity we make our reality.

Taiwan matter must cause all economic crises in the world.

Above disclosing all information, we have an opportunity to proper the world.

Then decision comes with military forces.
