

## KURODA International

Create the future

Transformation to a sustainable social system

KURODA International Foundation

Takeshi Kuroda

Capitalism makes occupation of wealth. This is reality as GAFSA. All technology in business is only a remark in lives. All education with this purpose may not be denied.

With a basic income of tail of society could dream new futures. Political system and social system with a full use of technology and IOT as IT could ask new society. These are bases with a new philosophy.

Business must be use of lives and may not be purpose of life. These reconstruction of society and nation could seek a future. With any agreement of politics could ask new reality. These realities may not be an illusion but reality itself.

They provide vulnerable groups with their poor lives, the same living environment and social construction in the agreement of equality.

For all duty of politics as any agreement goes with same living environment for all peoples.

All technological revolution may ask different possibility to the futures.

These revolutions are as same as French revolution, but Political determination make a reality.
