The invasion of Ukraine has a reason. That is, starting from the Orange Revolution, their nation shifted to under all control of the CIA. And they seek their diplomacy under all these bases. Joining NATO is a crisis for Russia even if they have all agreed by its tails of invasion with the Illuminati. As we have to know the word, any war has started by its agreement by its tails.

Amidst these power games and the truth that lies beneath, we must not overlook the potential tragedy unfolding in Ukraine. As we delve into history, we find echoes of the present, reminding us of the gravity of the situation.

So we find heroes from Hollywood, such as Captain America. He is defined as the first hero of this planet. Then, we find justice in the USA.

It is unacceptable for people to be trampled under the egoism of those in power. The hopes of these new worlds always exist in people's dreams and hopes.

Any war gives only a tragedy. This is any learning we have to know from any history.

Those who put in power and have them only gain their purpose and wealth under all these war games. Then we have to ask what is a justice?

This must be the reason why all politicians may not lie a word. This is a way to expand the new future.

How many tears may we find in history? But we are all more than idiots since we have no lessons.

If we have a choice, the future may be changed as we see all the dreams we find with any child of Palestine. Any politics is full of responsibility for our reality with the world today. And they have a decision for the world.
