

KURODA International  
Create the future

Under basic income to reconstruct the system and reality.

Kuroda International

Takeshi Kuroda

New social systems are proposed under basic income. All social vulnerable are provided an average life environment with this system.

There is all progress in reality today. On the one hand, of truth, we see a new elite. But many are failed from eras.

This is a social agreement and sociology to judge the reality as we are not asking for all people's failures.

We need all reconstruction of the social system and save all social vulnerable.

The new governmental environments are based on new standards of administration.

There are all poor we see in 3<sup>rd</sup> nation as they may not reach lives. All these realities are proposing all new decisions and agreements in the world.
