

Under govern by new world order and how the reality we may ask for

Kuroda International

Takeshi Kuroda

Under waiting for any plans, we must be prepared for its participation in the future. There is all control of the world, but these come with only a reality. That is why we must face and participate in all these realities.

How we may calculate the world and any steps we may be allowed. There are governed by Illuminati, and they are seeking their government.

There we have to make different decisions. That is only an escape from reality to the future. We are trying to create other governments for our future.

These are the separation as we may consider war occasions. This means at least we need the equal reality of its bases.

We could request cooperation with the universe, and coming to any confusion must be included in all concerns with the universe.

As we build its independence, we may equally face the world.

We are trying to build its environment through society, industry, the army, education, life, and politics.

We may not belong but ask for independence from the world and future; since this is only permission, we may stand against the world.
