

Establishment of Asian Unified Conference

Kuroda International Foundation

Takeshi Kuroda

These make the transition to the same coalition as the EU. The coalition of shared currencies and the unification of the military and industry has an equal self-presence with the world.

These are to seek equal self-building with NATO, and I would like to propose to foster own capital in all industries, seek their cooperative relationships, and share a new future.

I would like to realize the unification of the world in self-diplomacy, the building of cooperative relations, and make self-proposals for the construction of a new world.

These realize self-independence in the improvement of the national environment, cooperate and participate with the universe, and create a new world.

These will seek out the foundations of a new society and life, and will realize the construction of a new life cycle based on basic income along with the improvement of social life in next-generation technology.

Creating a proposal for building a new world in the unity makes a self-presence in the reality of the future.
