

Unification of the world

KURODA International

Takeshi Kuroda

As we can see in the lyrics Imagine by John Lennon, we are trying to seek unification of the world.

We are facing new age called the age of Aquarius. We are making declare to participate in the universe. That causes us to make full cooperation with the universe.

The world is without pain and suffering as wars cooperate with all residents of the universe as we make all our steps in the universe.

That means we are trying to build a new civilization under the unification of the world.

Any potential and possibility are lying down in front of us, and we are determined to make them all.

That new reality here on earth must attract all universe residents, as they may seek cooperation and share the future.

All these cooperation must expand the all-new reality we have to see more than the dreams we are trying to put ourselves within.

Unification is based on seeking a new world; the future is all the promise we may dream within.

There we didn't afraid of change, and we hand a future.
