

Unified Asia and his declare

Kuroda International

Takeshi Kuroda

We have two divines of the world. This reality is with the elite and all poor.

With unified Asia asked for his promise to provide an equal life environment to all peoples. You are asking for basic income with new social systems.

Duty for social activity provides the amount of responsibility and gives all basic income. And new tax system and political environment are required new efficiency with all new technologies.

We are asking for a new cost standard that gives any convenience for any reality as a society.

We have any technological progress today. There is all use for society and any field of nation.

A child's birth rate is needed at 2.0 since this is the right environment to ask for life in a decent society.

Recreation of the region is under any comparison by the same measure in any field.

These are from the right decision of politics. We are not trying to be inferior to everything, and we are trying to be superior.

You may ask who could give a reality. Let me answer that any politics with determination possibly promise them in reality. Any academic progress and use make them possible.
