

Creation of virtual reality

Providing the possibility of realizing self-requests in virtual reality in the creation of virtual space on websites. The sales environment in virtual currency, such as product sales, games, services, coupons, tickets, listening to music and watching video, provides store participation in same framework and proposes the creation of a virtual world.

Participation in Avatar wants to develop and provide various possibilities in open source.

The possibilities of new technological innovations should be realized and demand should be asked to all customers.

The possibilities in the digital space want to realize the possibilities in technology and ideas.

I would like to propose it as a new life service such as cooperation with communication tools.
