create the future

With national digital currency and systematize all reality

KURODA International Foundation

Takeshi Kuroda

With a political decision to modernize nation with IT and systems. Bases with digital currency and all reconstruction of society under national industry. Domestic demand creates new society. These are rising up own industry with new technology and systems.

This change is moving forward to the future under own development and capitals. All national and regional government is under all use of computers.

Basic income is tails of new reality and tax for corporate tax and customs duty may bases to recreation of any realities. All these changes are perfectly different to all trade systems.

Any own realities are bases to be moved with IT and new systems. Digitalized new society is developed with own industry.

Moving to new society as society 5.0 is reconstruction of any field of society. These are with national plan and decisions.

Politics gives with any changes from existed to anew. These are as revolutions to all digitalized realities. There are new energy and new efficiency that gives new possibility to the nation.
