

World strategy

KURODA International

Takeshi Kuroda

The equal position is all necessity we may ask for its participation. That gives us the right idea that we need equal conditions under any to be compared.

The above gives us an equal position first time to be permitted the world strategy.

This is the only law we have to see in power politics. Russia is perfectly failed. Then we have to have a decision.

These cause new realities in the world. Only two presences we see within. That comes with east and west.

Then we equally ask for full cooperation. These cause the unification of the world.

These come with all our proposals. The west has its decision of self.

We have only two choices: peace or war, and what we offer to them.

Only after all remained, we equally have its justice.

Even in collusion, these can make complete decisions about the world and the future.
