

World reality

KURODA International Foundation

Takeshi Kuroda

Under the Russian army and China matter is facing the Western justice. This is the last situation of any histories as behind of the world as New world order.

The world may not find any decision but realities. Under any consideration we cannot find the ways but realities.

All space weapons and technology as any participations to space even with any contact are all realities, we may find the world.

As we can expect as world war 3 is all under the plans.

Only permission we can ask is disclosing all information and make a full revolution to the world.

Due to find all behind with all crimes are what we could be arrested for all.
