

Facing with the reality and future of the world

KURODA INTERNATIONAL FOUNDATION  
TAKESHI KURODA

Plans in the world are truth and the only reality in the world.

To deal with it, we call for the equal maintenance of all environments in the nation in any realities, and the standing for equality with the world in society, industry, military, space, education, and administration, with those are only condition to be permitted equally facing.

Along with that, dealing with foreign policy is all possibilities.

To deal with reality, we must seek the three divisions of the world, along with the world and confrontation with reality, and neutrality. We always choose neutral.

This is to divide of the world's thirds.

The only way to confront the world on an equal environment is to have an equivalent environment in ourselves. This is because they are only way to build same condition in space technology, military, industry, society, education, politics, etc.

This standard requires NATO forces, NASA and Roswell 13, Majestic 12, Colorado underground facilities, political organizations in Washington, DC, and the world's most advanced development and industry to develop their nation on an equal measures.

They seek new technical standards from themselves and renew the nation at those new reality.

These are only possible on a self-equality to face any reality of the world.
