

Transition to world unification

KURODA International Foundation

Takeshi Kuroda

The abandonment of the powers of all nations and the transition to world unification require self-determination in all nations at their heads of state, and realize world unification and establishment of its operation.

These promise to share the future with the world and cooperate in the construction of a new world.

For the realization of a unified political party in the world in all political parties, we would like to agree on the unification of the world and seek its realization.

Self-declaration to people presents a new world based on people's consensus.

We would like to standardize and realize social construction based on a new social system in the world, declare participation in space, and realize participation in a new future in that exchange.

The re-creation of the world promises the solution of the past and the creation of no pain with all history based on that new philosophy.

I would like to promise that these will be realized in cooperation with the universe.
