

KURODA International

Create the future

Participation in the world in the unification of all Asia

KURODA International Foundation

Takeshi Kuroda

The All-Asia Agreement will provide full cooperation between government, military and industry in participation in the Unified Conference. These will realize social development equivalent to the agreement to provide livelihoods to all people, and will give themselves the advantage of solving poverty in the world in participating in the world.

Equal participation in the world proposes to share its philosophy and discusses the future potential of the world with zero environmental impact and the participation of all its people.

The ideal is to share a society in which all children with own dreams after, and participation in these ideals should be able to share the future with the new world.

These seek themselves as the hope of a new world in unification, and I would like to present an aid to the hole of the world without exclusion or discrimination.

The fact that the world has the past with suffering means that it is possible in modern times to seek a solution to the future in a new breath and progress in the changing with times, and to seek to reach it.

Equal relations and cooperation with the universe are equally possible to achieve them in their assistance.

Self-proposal from world conflict to reconciliation wants to seek a new world in sharing peace.

We want to wipe the tears of all people in political decisions, not in the grace of God.
