Confrontation with reality to the world

KURODA International Foundation

Takeshi Kuroda

The India-Pacific strategy gains a siege of China and shifts to the ideal of World Government. These are plans to have World War III, seeking the elimination of the enemy nations of China and Russia and the reality of world ownership in Caucasians. These realities are advertised and given in the United Nations advertising tower.

Since they have behind-the-scenes events, their true exposure can demand world choice. Revolutionary matters call for the recovering of the world in resistance, as these are given in the agreement of all heads of state.

They seek the back of the army and the coup behind it. These are all confrontations with the world and the uprising of the Revolutionary War.

The truth is that these New World Orders have ties with the universe, and the restoration of these worlds seeks a revolutionary uprising, along with the cause of the Revolutionary War.

The cause of revolution seeks the holy war of Islam. The holy war uses justice.

The confrontation of the Holy War with the New World Order is that the world has a choice.
