

KURIDA INTERNATIONAL

2 divided world

Kuroda International Consulting

Takeshi Kuroda

Western camp and China group divide the world. These are the attitude to the New world order.

The Western camp has a justice that covers the world. But if we face reality, how can we find justice?

Who is aiming for what? That is what we have to know.

But we can not be away from coming changes in the future. All circumstances we have today may not be away from changes in the coming future.

If we could suggest you for your reality, you should give a world with your world vision. Then the world could ask his decision.

A change in public opinion always brings a change in reality.

We have technological and industrial revolutions today. And still, we have a future.

That tells us that we need our decision for the future. The decision is a future. That is what we have to know.

New technologies seek a new technological civilization in the future. So politics could give lead to a world.

We are clearly at a crossroads in history. The primitive age of the past is today seeking a new world in technological progress. As we find above, we know we need a new social system under all advancement of new technologies.

The unification of the world expands any possibilities for the universe in the future. This is a remark that we could ask for a world government.
