

3rd world

July 18th, 2024

KURODA International Consulting

Takeshi Kuroda

The third world created our reality. The economy, military, finance, and space technology ask for their independence from reality under the third world.

All these are under diplomacy with its consensus and agreement. Above these, we first find our presence in all reality in the coming future.

We offer its bases by the unification of Asia. We may gather all our groups under any circumstances, such as the planned World War 3.

This is a third world in which we may dream of a future as any cooperation with space entities. And all these are the only possibilities we may ask for our survival.

The rest of the two worlds must be good, and evils must seek Armageddon. We can easily own the world by being a silent observer of their wars.

These are our consulting, and we may even be not far from World War 3rd. And this may be the way we can totally possess the world in our hands.

We establish all our realities under the next generation of technology and systems, which are governed by a new system and framework.

Based on Eastern philosophy, we may ask for independence to make an equal presence in the world.

Then you can find all the descriptions we sent you. Under all those ideas, what can you find to follow all our ideas?

I may ask our kings to see the future. Our ideas are all from KURODA International Consulting to recreate the world new.
