

KURIDA INTERNATIONAL

A New Cultural Revolution

Kuroda International Consulting

Takeshi Kuroda

We had them in the past. But today, we make them again to shift society and livelihoods with digital technologies.

A new social system only permits the future as we ask for all lead of politics and make a new nation.

Communism asks for all equality of reality by all peoples. And digitalized new realities are from domestic industries.

Politics determine them as we could ask for considerable changes in any reality and social system, such as revolutions.

These offer dramatic life improvements, and life improvements provide for dramatic improvements in the nation.

5-year plan totally makes them different from the past to the future since politics could create all possible.

We are not trying to be away from any changes. That is all necessary to participate in any reality of the world.

As I describe, equality is the only condition to face equality in the world.

You need proof of your actions. How do you tell humanity to see all conditions in Tibet and Uyghur?

All beings can only earn trust in their actions.
