

## A Study on a Free Economic System

KURODA International Consulting

Takeshi Kuroda

Under the insistent of the Chicago group, there must be the magic of this system. And liberalism follows all bases of reality.

With all realities, we can find a wealth gap. And competition gives progress and the future. Economic activity covers any field of reality under making themselves with capital.

Without any doubt, this is an engine of the world called the economy. These are under possession and competition by its rule. These have a creation of hierarchy.

As we are trying to ask for any consideration for poverty. Economy by its free economic system gives progress of any realities under business.

As we may wonder free economy gives all solutions by its progress of self. But in truth, this has a gap of wealth that we may consider the exploitation of wealth from the weak.

A free economy is a competition under its economy. There is all admired by any construction of business due to their service to life and society. But money games exist with the moral of business. Contradictions are conflicts, and the economy uses people to its advantage.

Paradise is not a slave. The competition requires the most demanding requirement, which is called progress.

There must be an illusion of reality. As we meet any existence of the business, we seek an explanation by philosophy. If we reach progress in academics, we may get an answer.

In truth, the economy is use for life. But away from all reality, there is a money game. This is philosophical considering for any solutions.

We may ask for a decision in all business fields. That is with morals and new rules.
