

A moment of judgment by the world and futures

KURODA International

Takeshi Kuroda

There is a change of the world. It must be a judgment with a ticket to the futures.

There are all progresses we are facing with reality. That means there are beings who fail it.

Waiting for new civilizations with all new technologies but there is all judgement with.

These are reality we put ourselves today. More ha all struggling we have now.

Any nation must pass through all reality that is all revelational change we are participating with.

Because handling with all new reality there who must fail himself.

We could be sure of it to see the world.

All these are decision from futures. That what we have to work for. That means we have to work for the futures.
