

A new social revolution in the USA

KURODA International Consulting

Takeshi Kuroda

Starting from the IoT revolution, they have a new life and society. There is a difference between change and existing. That is a difference in the use of computers.

They find all use of computers and build a new life and society. That comes with an all-revolution of all realities. As we may not all industry gives themselves all these standard that lead the whole world.

These give a new lifestyle, and they enjoy all these changes. That is their style, and they have a moment they have been seeking.

Without any doubt, these are the revolutionary change with IT and IoT as all computers. They are still seeking new futures.

Their style is all acceptance of a new and better, giving all results of all realities.

They are not trying to stay in the past but in new futures.

Their reality is totally changed. They now have a new style of social system and life.

These are from all use of IT and IoT as computers. Honestly, all these new systems have full of use and progress of efficiency. That is all change of their new reality.

We may know that all holly wood is a dream in space that they have. And we are not running away from all changes. For all results, they are leading a new world.

They provide them to the world and try not to steal from them. That is a new style, as they are under President Trump's unilateralism.

This must be called a future that the world finally reached. For the last all it remained, you do have a choice. That is all that it exists.
