Kuroda International Consulting

Takeshi Kuroda

We have a new step into the universe. These are more than any adventure with all our realities, and Tonight we have to see a Holly Wood movie.

All these are the dreams and the reality we are promised in the future, so we are making them a reality.

We have all new contact with the universe; politics could ask for any alliance with them. They could provide us with the reality of the future we may dream of.

All these are based on new infrastructure and human resources, as they could be the basis for all new possibilities we realize.

These are under national projects, and all new technologies are asked for any use in society and life.

As we insist, politics has a decision, and they could make all realize. And we have to see politics decide the future.

The minimum requirement is to travel the whole universe under any contact with them. And expanding to cooperate in a reality we will put ourselves in the future.

How could we expect an expansion of all possibilities even in the future? We have a decision to design the future. That is what I am trying to do.

Technology gives us new possibilities, even as we could recreate the world from ancient times to the future.

Politics may design the world and the future since they have a decision.

Be a Mr. John. F. Kennedy and make the future under your ideal.
