

A new world system under any agreement of all nations

November 29th, 2024

Kuroda International Consulting LLC

Takeshi Kuroda

The new consensus of the world is under all agreed-upon new consensus, which is new world systems. These are the agreements that will make a new world.

Financial, trading, military, diplomatic, and social systems may be renewed under fair rules that permit the entire agreement of all nations to share the New World.

We can reconstruct the world with all new hopes and ideals. To do so, we may gather all new talent and human resources from any region of the world.

These are the shift from all conflict and disappointment to new hopes.

Because any agreement can happen with the world, we need new leaders.

We do not need a king but the future. So he must be a king who gives us the future.

We all have our own decisions regarding the world, which is any proposal from us to all representatives of the world.

These are the best honors of Kuroda International Consulting LLC.

If we are gifted real politicians, they may give the future and the new world. These are under his leadership.

We also have a redesign of the world, which is any description from our office to the world.

If the world seeks World War 3rd, we may say go for it.

But who takes all responsibility for the world? That is all the habit of real politicians.

Let me ask the last decision of the world: You may have yours, and I have mine.
