The transition to unified global management under majority rule will confront the United Nations government in the New World Order and require us to take action ourselves.

In this regard, we will seek cooperation from space and demand a decisive battle in World War III.

We want to quickly realize the construction of this new global framework and face reality head-on.

Only we may not refuse any dialogues. That means any cooperation may create a new reality.

These are the end of the power game, and all world decisions are made under power itself.

We need to prepare to use all nuclear and space weapons.

The communication to all nations in bilateral talks clearly opposes the New World Order.

These are the divisions of the world. Cowards are slaves to power. We are the ones who choose to fight.

We may find that all these are the world's decisions and the future itself, in which we can work with the world.

Then, we may gather all human sauces and rebuild our reality.

We may know the key is any contact with the universe, and they have theirs. We must understand that we have all the possibilities of victory.

Politics always leads the world.
