

A new world with a new action

KURODA International Consulting

Takeshi Kuroda

The world is divided into two: China and the liberal camp. An empire with an emperor stands against the future.

World war 3rd is all demand of the military-industrial complex. How could we calculate the future?

Suppose we leak any information as we build our justice. What can you find in the world?

Disclosing all information allow us to face all justice in the world. People should make a decision.

As if all ideas are realized in the world, true justice may cover the world. And we would wonder about the world revolution.

And above in the space, new participation with justice could stand against all realities.

This is full of the possibility that we could stand equal to the world.

We are then asking for all decisions of the people. This causes a world revolution. Then we can find a victory.

After all, we are trying to make our world, not theirs. That is all remarks we sent all proposal to the world from our office.
