

A new year with a new wind

January 6th, 2024

KURODA International Consulting

Takeshi Kuroda

Great reset is a creation of their world. It must start in a second.

There is a decision to face all changes to come. And we need our tails to meet them in a change.

There is a wave we can not be away from. So we need to possess ours. We may have our vision for the world.

Any details of the plan for the future and the world must be judged by reality itself. We make all considerations and calculations for the world himself.

What does the world follow? Ideal or the reality?

All tails are fully prepared by reality, as have all technologies. We have a decision for the future. And what could be the design of the world then?

All human sources may be gathered and build all designs of the world and the future. We are trying to recreate the world.

Expanding to all space with our realities may force us to settle new realities for stepping into all new technologies.

We need to be prepared for a new future. As you may know, I insisted on the unification of the whole of Asia. They could serve us with presence and any fundamentals of the realities we are trying our steps into the world.

There are unlimited new possibilities, as we see in all new growth in the business field. And we may realize them in a world.

Politics has a decision for them all. So, do make new decisions for the world.
