

ASIA VISION and plan for a region

December 22th, 2023

KURODA International Consulting

Takeshi Kuroda

Asia must ask for its world vision to unify the region and request for its presence in the world.

VISION

Peace with the abolition of war bases all consensus and seeks to reconstruct any realities under new technologies and standards.

To promise the same livelihood conditions to all peoples may base the region's unification and redevelopment of the area under new technologies.

The free educational system must give the same opportunities to all children and provide a lifelong learning environment.

Under the control and unification of industries and militaries, new security exists under all political decisions. All these expand to all new space technology and development.

PLAN

Unification of the region must be based on a complete agreement of all representatives of the nations. And we are determined to create the future.

All these realities are under any alliance with the space entities. And we are expanding our steps into the whole universe.

All these are the creation of academic proposals, human sources make the details, and politics make all the decisions.

The consensus of popular sovereignty enables the construction of a future based on people's ownership of the world.
