

Abandon of wars with earth

KURODA International

Takeshi Kuroda

As we may seek all past of history that we may find wars any moment here in earth. This is a short period of times we have a peace with appearance of USA.

With invasion to Ukraine, we may ask UN councils for abandon of wars in earth and unification of self.

All lives to lose we could find in Ukraine that all conscience of the world must agree and follow all these ideas.

All voices and we are facing moment we could rim a hand and ask own voice to the world.

That is a proof that violence may not be a justice of the futures.

With all choice of the peoples, we may ask questions for the reality.

As any being talk his justice, we have to ask all proof.

Philosophers must give right answer to all reality with all solutions.

Love is an all agreement of the world that we may share and ask own actions.
