

Abandon of wars

Kuroda International

Takeshi Kuroda

Waiting all reality as World War 3 we propose abandon of wars and unification of the world. These mean we are standing equally to the world.

There we find our reality standing equally to the others. That we see justice facing equally for each.

We may find with own opportunity with democracy that any place of the world to be agreed.

If it comes agreement among with all political party, we could build own realities.

As we could cause world revolution against all realities.

Then it must be different between own standing point as justice.

All these realities are with Ukraine matters. How we could imagine settlement of the world?
