

Age of the people

Kuroda International Consulting

Takeshi Kuroda

Starting from the era of the USA, the world gains the reality from the people. It is an age of people which started in the 20th Century.

It is all bases of liberalism that yell for their justice. Under to be governed by reality, all despotic states are denied.

At people's age, all peoples celebrate their freedom. Once you put yourself into all these realities, you may not be back to a despotic state.

The last tyrant may be called China. Due to Russia's already failed. They are feared by the freedom that contains all dreams.

Under any curiosity, you may doubt, but this is the correct explanation for two different realities of the world.

Without any doubt, it started in the USA, and it covers the whole world. I do believe they are perfectly right. And liberalism is the highest philosophy of its progress. That must be all reason the world follows them.

As 20th Century was the revolution that they had been fighting against. Now we have a future. What comes to your mind?

This occasion is rightly showing armageddon. The tyrant is trying to fail himself.

What is the future? It must be a hope that we are gathering on.

We are facing independence day; we find all stories to see holly wood.
