

Agreed to unify the world and transition to World Government by majority vote at the United Nations General Assembly

KURODA International
Takeshi Kuroda

As facing any realities of the world, I do propose a vote in United Nation General Assembly with our majority. These are agreement of unification of the world and abandon of wars.

This means we are standing equally to New World Order.

Africa union and South America union, Asia union could ask same agreement. That means we have advantage. Then we could ask a full discussion to show them with disclose any information to publicity. This business conversation could seek any agreement.

We are trying to ask majority to the world.

Then disclose for all tails of the world, we could own the world within our hand.

That means we have own decision with a world.

Moving own army not under their justice but our justice than.
