We may wonder if all colored and black races may ask about their participation in any opportunities in the world. This gives us an idea. Equal participation is what it is.

We equally share the world that may not be an idea but tail to the future. Any steps of being may not be judged under difference but by sharing the future.

All black race is feared by racism. It avoids equal participation but fears the reality. If we may judge the world by equality and race, what can we find within a world?

Paradise may ask for all judgment to all realities. Black race must be given the same dreams.

These are some ideas for reality under agreement by equality. Additionally, we find all valuable people if they may ask themselves in life as same as all. There must be a change in the reality of the world.

Even with white races, there is a strong hierarchy. To know the truth tails of hierarchy, they may not reach wealth.

These are the reason we insist on equality as equal opportunity to create in all realities.

If the world is filled with dreams, equality is all conditions all people are permitted to participate within.
