

Agreement on national autonomy and independence

KURODA International

Takeshi Kuroda

For all nations to face autonomy and same agreement to the world that may ask the new world. There we have all tails of reality, even with the Ukraine invasion.

This is the unification and abandonment of wars to participate with the universe.

This agreement may not even ask for a rejection of the nation.

We have to take the majority of the world and equally face the world.

We may imagine that to build justice for each what we can see with the world?

Then we have full permission to move our army.
