Takeshi Kuroda

They must be born beside their dreams. The world must not steal it. Even all children in the Gaza Strip and Ukraine need their future.

Who can take full responsibility for this? We need a leader, a 'real politician ', who can champion the cause of children's dreams and future in conflict zones.

Trust is the basis on which we can ask for the future. We can't ask for any lies in politics.

Let me ask all politicians and all representatives of all nations: do you want to kill your children or not? We must find the same reality for any conflict and war.

The world must be possessed by all peoples. That is where we can find all our dreams.

Hope is a light we can follow. But is there any hope in the Gaza Strip or the Ukraine?

This is all proof we need to have real politicians. That is who solves all the problems and conflicts in the world.

If all adults take responsibility for all children, the world must be changed. We can't insist on personal profit against all tragedy in the above regions.

If we share the future, racism must be denied, but we will share all new hopes and wishes.

This is a moment we dream of as children, but all children are murdered in the Gaza Strip. Instead, we must find peace. Peace is a base where we find all dreams.

We could insist that politics must make the decisions of the world. That means we have to plan the world on our hands.

This is why we may find a king who serves all people and gives us the future.
