

All new creations of the world with intelligence and human sources

December 16<sup>th</sup>, 2023 Kuroda International Consulting Takeshi Kuroda

Intelligence may cause all progress of reality as we are trying to recreate the world. We may gather all human sources to ask for the future.

Intelligence may have itself to create the future as any demand of ours. It is all use of academics in reality and the future.

Human sources have the skill and ability to make them realize in the world. Any vision and demand may be allowed, but we are trying to make all timelines.

With the same amount of intelligence, we are provided reality and the future. That is all necessary for us to gather all human sources.

Politics makes the right direction for the future. We are creating all the details and timelines.

The inland matter may be a growth of reality with all new technologies by its use, diplomacy is all calculations of any realities with all proper strategies, and we are making further steps into the space that require our adequate vision.

Any discussion of all intelligence may give us an excellent opinion and future. That must be an idea we may follow.

These are the creation of a new world and the future. Do we have the right vision? Politics may give us a vision, and we may create plans and details.

No matter how lofty the goal, talented people can achieve it.
