

All new relationships to the universe

July 8th, 2024

KURODA International Consulting

Takeshi Kuroda

They have all made technological strides, and our progress is on the ground. These differences underscore the importance of sharing advancements for future growth, motivating us to contribute to this collective effort.

We will indeed declare that we will ask for our steps into the whole universe. But we see who occupies all these opportunities. If the world is for all people, we have our decision.

We must know that these relationships with the universes require a sober evaluation and construction of relationships on an equal footing. To face far more significant technological advances is to face far greater possibilities. These are complete changes to the future timeline.

We see we are facing Holly Wood in reality. But it doesn't come to the illusion that we have to know.

Our plan design is needed based on our decisions. That means we need our plan to step into the universe.

These are the realities we declare to participate in the universe as members of it.

However, these are not illusions or imaginations; reality is based on our choices. Then, we must find that Holly Wood is a reality that lies in front of us all.

I force all politicians to make decisions. You have a world decision.

Understandably, doubts and skepticism exist about these realities, but they are true. The beautiful women of the Earth attract the Kings of the Universe.

Our surprise may not allow us to reach the future. Then, we have to face all the challenges. I am offering a journey to the universe instead of Tahiti and Jamaica.
