

American Dream

Kuroda International consulting

Takeshi Kuroda

All challengers and braves put themselves in a field. They desire their dreams.

They admire all its heroes. Their style of reality is that we may wonder about spending ourselves in a dream. All they have an equal tail called effort.

They have a paradise in their land. That is truly a dream.

As we may see today, they have a new reality in a nation according to their dreams. This is a new society in new technology and systems.

What do you seek in dreamland? You have to ask for your dream.

As I spent in the youth of my days, this was an experience that life changed. That I am in touch with a dream of their wishes.

If the world loses hope, then what do we find? It must be a dream as hope for the future.

In an age of moment from Europe, what do they have in mind to move forward with their dreams?

What is different from the eyes of children?

In a world that may give you a dream? They must be a saver of yourself.

We must thank the USA for the god giving them to a world.
