Kuroda International Consulting
Takeshi Kuroda

As we find any racism and problems of Black races, the whole of Asia declares the world out of any issues of races.

All conflict but the world out of them that we dream of. We may propose a new world. And the world with a new agreement if we could make all new designs.

The reconciliation gives all new possibilities as we may seek a new world.

All these are required with the whole of Asia and to expand all reality to the world.

That gives us to face a new attitude to Africa and all black problems. But we ask for its reconciliation to any realities.

These are given our declaration that it is all reconciliation of all races. And indeed, we may seek cooperation and seek a new world.

All these are new bases of any foreign affair. We are trying to create a new reality under all these agreements in our groups.
