

Any idea to judge for invasion of Ukraine

Office
of
Kuroda International Consulting
Takeshi Kuroda

Invasion is not accepted under peace, and we need all solutions to any history. War crime must be judged under laws and fairness.

In truth, we find all tragedy of all reality in Ukraine. All these must be decided and not accepted by humanity bases.

There we could make any consensus about all reality which means we may all have the same decision because we have the same reality in history.

All these consensus could expand to any reality and world, future themselves. That means agreement could create a new world.

That forces us to judge under any truth. Since we have all tails of any reality of the world.

World politics and society may reach all these agreements. That may cause the future.

If this agreement could be a tail of the world, we may seek a normal future.

We must be clear that we have the same reality in all of history, so we propose to solve all problems of existence.

This is a challenge for seeking a future. This comes with the best owner from our office to the world.
