

Any realities we could expect in the future

KURODA International Consulting

Takeshi Kuroda

The new world order asks for world war 3rd, and they expect it from their world government. Instead of all these realities, we find the Russian and Chinese alliance.

We find Anglo Saxon's mission and alliance with Israel. All these are the correct explanations for the world, and we must make our own decisions.

There we find any contact with the universe. Then we are facing all reality of the world.

If we disclose all tails of the world, we could expect a revolution. But we may not find any details in the future.

But all tails, if they cover under the military, we cannot ignore all those realities. These are the points we have to argue that the unification of Asia must stand against all these realities, and we have to cover the entire World.

We need justice for all these crimes. And the military should follow them.

We might have an answer as we ask for any contact with the universe.

And we have to build our world government against United Nations.

Under all those circumstances, how could we find a world?

We are forwarding to a new world under our ways.
