

Any responsibility for any pain, suffering, and sorrow.

April 5<sup>th</sup>, 2023

Kuroda International Consulting

Takeshi Kuroda

We have all tragedy in the Gaza Strip and Ukraine. All their tragedy may not be ignored if we try to share the world. We need to share their pain, suffering, and sorrow.

These are the right attitudes of the new unification of the world and the new consensus of the world.

We could share any decisions against them.

We may make the same decision against all these realities since we are trying to seek the new world.

If we have the same reality as they are, we may not stand in any circumstances they have. These are totally the same with their people.

Even in history, we may share the same decision against it. All these are recalculations under humanism.

All weak may not survive under the law of the strong. And we have wisdom based on all academic progress. We may redesign the world for all.

Change may not be feared. These are the recreation of the world.

Who has a decision? The answer is any politics.

Who dares to take any responsibility for the world? The answer is Kings.

We have a choice to stand against any reality, even with history.

Since we are trying to make the future.
