We have all history that is filled up with wars. Wars give all tragedy with pain and suffering to its people. What is the reason caused by all wars? Benefit and any purpose but justice.

Under asking any decision with humanity, there is all agreement, possibly asking for a world.

All weak had had only tears in all those realities. That forces us to make the right decision.

Under all facts, we all had spent in the past that may seek a complete agreement against all reality in Ukraine.

We are not trying to blame who, but we are asking for all history solutions.

Two different realities we have with war. Wealth and prize of the winner and all tears of weak.

But starting from the USA age, it began of people's ages. That means people have their decision to reality as history.

In the 20th Century, they had asked for revolution. People had been fighting against the world.

Any problem of history may be gathered in all reality of Ukraine. That is all reason we are asking for all solutions. Since the solution may give us a future.

All remarks are not with the profit of any kings but all tears we find in Ukraine.
